

PLASTIC BAG HAVING FLAP CONSTRUCTION

ABSTRACT OF THE DISCLOSURE

[1] The invention sets forth a bag for an animal waste collection device. The bag is formed from a blank of plastic material, and comprises a middle section panel, a back panel, and a pocket front flap section. The bag defines a collection pocket formed by the front panel and back panel to accommodate waste collected from an animal waste collection device. The animal waste collection device collects animal waste from the bag at the pocket adapted to receive an animal waste collection device and the collection pocket accepts collected waste from the pocket adapted to receive an animal waste collection device.
